REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Deane, Burns and Stimson teach rotor assemblies comprising a hub retained on an axle, a sensor that detects the rotation of a radial disc and friction surfaces. However, the prior art of record does not teach a cylindrical member having a first end and a second end with a sensor flange thereon, said first end being concentrically retained in said cylindrical body of said rotor such that an axial lip on said sensor flange engages said radial disc to define a gap between said sensor flange and said radial disc or a gap allowing a radial disc to move independently of a sensor flange such that said plurality of first and second reluctance sections remain aligned with said sensor with changes in the perpendicular alignment of the radial disc and said hub and said signal remains as an accurate indication of rotation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie Torres whose telephone number is (703)305-0293. The examiner can normally be reached on Monday-Friday, 6:30 AM - 4:00 PM.
